REMARKS

Reconsideration of the present Application is respectfully requested. No new claims have been added. Claims 1-48 are currently pending.

Rejections based on 35 U.S.C. § 103

The Office Action rejects all pending claims under 35 U.S.C. § 103(a) over U.S. Patent No. 6,175,856 to Riddle ("Riddle") in view of U.S. No. 6,525,830 to Yang. For the reasons stated below, Applicants respectfully traverse the foregoing rejections and submit that the aforementioned claims are patentable over the prior art.

Applicants incorporate by reference herein their remarks in their previous substantive Response (dated May 21, 2004), and reassert their comments with respect to Riddle. The Office Action concedes that Riddle does not teach a printer.

Regarding Yang, Yang was filed on September 8, 2000 (six months after Applicants' filing date of March 8, 2000). Yang is a CIP from abandoned application filed Nov. 5, 1999. Without having been provided a copy of Yang's parent application, Applicants cannot properly respond to the Office Action without being able to determine what matter is entitled to parent's filing date.

Applicants have amended each independent claim (1, 13, 15, 26, 35, and 45) to recite substantially "wherein said transferring includes performing coordinate transformations to the data file." This feature is not found in any of the prior art and should place the application in condition for allowance.
